Horse Report Legend

SpeedForm (SF):
- A composite of raw speed ratings adjusted for conditions.
- Higher = horse is consistently faster relative to par.
- Percentile shows how this horse compares to the field.

ClassΔ (Class Delta):
- Measures the difference between horse's class level and par for the race.
- Positive = dropping into easier company.
- Negative = stepping up in class.
- Percentile indicates ranking vs. field.

Bias:
- Track bias factor (post position, surface, rail setup, etc.).
- Positive = setup favors this runner's style/post.
- Negative = setup works against this runner.
- Percentile shows relative advantage/disadvantage.

Flags:
- P = Playable (horse passes filters, not always a bet).
- PRIME = High-confidence bet meeting strict thresholds.
- ACTION = Secondary bet, looser filters, smaller stake.

Edge:
- Difference between model probability and market probability.
- Positive = overlay (value bet).
- Negative = underlay (no value).

Fair & Min Price:
- Fair = odds at which bet would be break-even.
- Min Price = minimum acceptable odds given risk filters.
